## **MHPAEA Summary Form Instructions**

The below summary form is prepared to satisfy the requirements of 15-144 (m)(2), Insurance Article, Annotated Code of Maryland. The summary form must be made available to plan members and to the public on the carrier's website.

Confidential and proprietary information must be removed from the summary form. Confidential and proprietary information that is removed from the summary form must satisfy § 15-144(h)(1), Insurance Article, Annotated Code of Maryland.

The MHPAEA Summary Form includes the MHPAEA Data Report.

Carriers must use the terms defined in COMAR 31.10.51 and the *Instructions for MHPAEA NQTL Analysis Report and Data Report* to complete the summary form.

Exclusive Provider Organization (EPO)

Under a federal law called the Mental Health Parity and Addiction Equity Act (MHPAEA), Cigna Health and Life Insurance Company must make sure that there is "parity" between mental health and substance use disorder benefits, and medical and surgical benefits. This generally means that financial requirements and treatment limitations applied to mental health or substance use disorder benefits cannot be more restrictive than the financial requirements and treatment limitations applied to medical and surgical benefits. The types of limits covered by parity protections include:

- Financial requirements—such as deductibles, copayments, coinsurance, and out-of-pocket limits; and
- Treatment limitations—such as limits on the number of days or visits covered, or other limits on the scope or duration of treatment (for example, being required to get prior authorization).

Cigna Health and Life Insurance Company has performed an analysis of mental health parity as required by Maryland law and has submitted the required report to the State of Maryland. Below is a summary of that report.

If you have any questions on this summary, please contact Customer Service at 1 (800) 997-1654.

Behavioral Health Benefits
1 (800) 433-5768
24 hours a day, 365 days a year

Medical, Dental, Vision 1 (800) 244-6224 24 hours a day, 365 days a year

TTY/TDD Service (For callers who are deaf or hard of hearing) Dial 711 and follow the prompts 24 hours a day, 365 days a year

#### **Overview:**

We have identified the five health benefit plans with the highest enrollment for each product we offer in the individual, small, and large group markets, as applicable. These plans contain items called Non-Quantitative Treatment Limitations (NQTLs) that put limits on benefits paid. What these NQTL's are and how the health plans achieve parity are discussed below.

## 1. Definition of Medical Necessity

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

(MH/SUD) ecessary/Medical Necessity
ecessary/metrical mecessity
ervices, supplies, and medications provided for the eventing, evaluating, diagnosing or treating a Sickness, ion, disease or its symptoms, that are all of the following I by a Medical Director or Review Organization: red to diagnose or treat an illness, Injury, disease or its toms; cordance with generally accepted standards of medical ice; ally appropriate in terms of type, frequency, extent, site uration; rimarily for the convenience of the patient, Physician or Health Professional; ore costly than an alternative service(s), medication(s) or y(ies) that is at least as likely to produce equivalent peutic or diagnostic results with the same safety profile the prevention, evaluation, diagnosis or treatment of your tess, Injury, condition, disease or its symptoms; and ared in the least intensive setting that is appropriate for elivery of the services, supplies or medications. Where cable, the Medical Director or Review Organization may are the cost effectiveness of alternative services,
ies, medications or settings when determining least sive setting. re services described in this certificate are considered to Necessary.

Where applicable, the Medical Director or Review Organization may compare the cost-effectiveness of alternative services, supplies, medications or settings when determining least intensive setting. In determining whether health care services, supplies, or medications
In determining whether health care services, supplies, or medications are Medically Necessary, the Cigna Medical Director or Review Organization may rely on the clinical coverage policies maintained by Cigna or the Review Organization. Clinical coverage policies may incorporate, without limitation and as applicable, criteria relating to U.S. Food and Drug Administration-approved labeling, the standard medical reference compendia and peer-reviewed, evidence-based scientific literature or guidelines."	are Medically Necessary, the Cigna Medical Director or Review Organization may rely on the clinical coverage policies maintained by Cigna or the Review Organization. Clinical coverage policies may incorporate, without limitation and as applicable, criteria relating to U.S. Food and Drug Administration-approved labeling, the standard medical reference compendia and peer-reviewed, evidence-based scientific literature or guidelines."

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

A review of Cigna's written policies and processes reveals the comparable application of Medical Necessity to M/S and MH/SUD services within the applicable benefit classification. Cigna's Medical Necessity coverage policy development and application process is consistent between M/S and MH/SUD. Cigna applies comparable evidence-based guidelines to define established standards of effective care in both M/S and MH/SUD benefits. Compliance is further demonstrated through Cigna's uniform definition of Medical Necessity for M/S and MH/SUD benefits.

Consistency in policy development, process and application evidences compliance with the NQTL requirement that the medical management process be applied comparably, and no more stringently, to MH/SUD services than to M/S services.

#### Peer to Peer Review Variation

With respect to MH/SUD benefits, and in contrast to the process for performing M/S benefit reviews, Cigna ensures that any potential denial of MH/SUD benefits is preceded by a proactive offer to the provider of a peer-to-peer review for certain services including Inpatient and Outpatient All Other benefit classifications. The objectives of proactively seeking a peer-to-peer review is to minimize the risk of issuing a denial where, in fact, the enrollee's clinical situation warrants an approval for medically necessary care yet the provider's request may have incompletely or imprecisely stated the case for medical necessity, or, if a denial is nonetheless issued, mitigating disruption if the loss of coverage results in the enrollee moving to a different treatment type or level of care. This process is beneficial for the enrollee and results in greater approvals and fewer appeals of medical necessity denials.

Cigna's medical necessity review of MH/SUD services is guided by the ASAM Criteria, MCG and Cigna's Clinical Coverage policies and plan documents approved for use in care management determinations. Cigna's Peer-to-Peer review program is triggered when a care manager receives clinical information that does not appear to meet the ASAM Criteria, MCG and Cigna's Clinical Coverage policies and plan documents for initial or prior authorization for level of care requested. In this instance, care managers may offer a lower level of care to ensure there is no delay or impediment to care where the medical necessity criteria is met. If that level of care is not accepted by the requesting provider (treating practitioner), the case is referred to Peer-to-peer review with a behavioral health physician reviewer.

The Peer-to-Peer review is available for any coverage request for which Cigna anticipates issuing a denial Cigna incorporates into its MH/SUD utilization review process a requirement that – prior to issuing a denial – a Cigna clinician proactively solicit a peer-to-peer review with the rendering provider. After completing the peer-to-peer review with the rendering provider, the Cigna Medical Director makes a decision to approve or deny the requested service, based on all of the clinical information provided. Peer-to-peer reviews that are declined by the requesting provider result in the Cigna Medical Director making a decision to approve or deny the requested service based on the clinical information that was submitted and obtained by the Cigna clinician. All reconsideration and appeal options are available if a case results in a denial, just as they are available for denials issues for an M/S request.

If Cigna's pro-active, *volunteer* Peer-to-Peer review were not applicable to MH/SUD services, and such services followed a similar process to the M/S benefit, services that were approved due to such Peer-to-Peer review, would have been much more likely to have resulted in a denial without additional information or discussion to meet clinical criteria. The provider has the right to decline the peer review and move forward retaining the same rights post-decision/denial. Cigna's pro-active Peer-to-Peer review is more favorable to the enrollee and the rendering/requesting provide resulting in a less stringent, more advantageous process for MH/SUD claims because it is proactive, as compared to the process for M/S claims whereby any peer-to-peer review is, unless otherwise required by state law, conducted reactively, i.e., if the rendering provider outreaches to Cigna.

Cigna has not identified any additional discrepancies in operational policies between MH/SUD and M/S benefits where the discrepancies present a comparability or stringency problem within the context of the NQTL requirement. Instances where discrepancies between the process of administering MH/SUD and M/S benefits do not present an NQTL issue include, for example, situations where a discrepancy in process is *more* advantageous to the administration of MH/SUD benefits than M/S benefits such as the pro-active behavioral health peer-to-peer review process outlined herein. The Peer-to-Peer analysis is addressed in the "in operation" section of this submission set forth below.

Cigna regularly reviews utilization management data to evaluate and ensure operational compliance of the medical management suite of NQTLs, including Medical Necessity and Appeals, Prior Authorization and Concurrent Review. Data is reviewed by benefit classification and subclassification to calculate denial rates to ensure comparability. Cigna's application of the medical necessity

NQTL, specifically approvals and denials rates, for Prior Authorization, Retrospective Review, and Concurrent Review across benefit classifications for a sampling of Cigna plans revealed no statistically significant discrepancies in medical necessity denial rates as-between MH/SUD and M/S benefits for the Cigna book of business including all commercial data Medical Necessity denial rates.

Cigna utilizes appeals data to review the number of utilization review decisions across the book-of-business. Appeals data is delineated by pre and post services and includes prior authorization and concurrent review, overturned for the same time period relating to the utilization management data metrics included in Cigna's book of business data. Data reflected overall comparable overturn rates across benefit classifications.

While the rate of appeals, where the original denial for lack of medical necessity was upheld, is higher for MH/SUD than for M/S claims for the Cigna book of business. This appeal rate, coupled with the utilization management data reflecting higher Medical Necessity denial rates for M/S claims than for MH/SUD claims is representative of Cigna's proactive approach to peer-to-peer review. Approximately 37% of all pre-service MH/SUD peer-to-peer reviews inclusive of read only reviews, which includes a Medical Director review of the medical file without discussion when a peer-to-peer is scheduled but the requesting provider does not attend, in Cigna's book-of-business data resulted in approvals that may have otherwise have resulted in a medical necessity denial.

Additionally, Cigna conducts routine (occurring no less frequently than annually) Inter-Rater Reliability (IRR) testing is used to evaluate consistency of clinical decision-making across reviewers and to identify any potential revisions to coverage policies that may be warranted. Corrective action is initiated if a score falls below 85% and if the results are below 90% the Medical Director will evaluate the scores and decide whether to convene a review process with the Medical Directors/Physician Reviewers. Of note, the company's most recent MH/SUD IRR exercise did not reveal a need to revise its coverage policies governing reviews of MH/SUD benefits.

The number of utilization review decisions across the Cigna book of business data, reflects comparable average denial rates based upon Medical Necessity across all benefit classifications for utilization management programs including prior authorization, concurrent review and retrospective review with medical necessity denials for M/S services on average higher than medical necessity denials of MH/SUD services. While operational outcomes are not determinative of NQTL compliance, and a plan may comply with the NQTL requirement notwithstanding a disparate outcome

for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement.

Cigna concludes the Medical Necessity NQTL is applied comparably and no more stringently to MH/SUD benefits than to M/S benefits. In performing the 'as written' comparative analysis Cigna reviewed applicable policies, processes and procedures to ensure comparability of the application of Medical Necessity to M/S and MH/SUD services which revealed the application of Medical Necessity to be applied to MH/SUD services no more stringently than M/S Services. In performing the operational analysis of the application of UM, Cigna reviewed denial rates for both M/S and MH/SUD within each classification of benefits and for benefits subject to prior authorization, concurrent review, and retrospective review.

#### 2. <u>Prior Authorization Review Process</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
Direct Access to Obstetricians and Gynecologists	
You do not need prior authorization from the plan or from any other	
person (including a primary care provider) in order to obtain access to	
obstetrical or gynecological care from a health care professional in our	
network who specializes in obstetrics or gynecology. The health care	
professional, however, may be required to comply with certain	
procedures, including obtaining prior authorization for certain	
services, following a pre-approved treatment plan, or procedures for	
making referrals. For a list of participating health care professionals	
who specialize in obstetrics or gynecology, visit www.myCigna.com	
or contact customer service at the phone number listed on the back of	
your ID card.	
Prior Authorization/Pre-Authorized	Prior Authorization/Pre-Authorized
The term Prior Authorization means the approval that a Participating	The term Prior Authorization means the approval that a Participating

The volume of in cost is identified as a high unit cost per service for services per year is also reviewed, including a review of high consideration in requiring precertification. The volume of denial rates. Cigna does not discriminate by provider type or services per year is also reviewed, including a review of high denial rates. Cigna does not discriminate by provider type or region of the country. Coverage policies apply to all providers working within the scope of their licensure (for example, Cigna region of the country. Coverage policies apply to all providers working within the scope of their licensure (for example, Cigna would not consider a coverage request for neurosurgery from a chiropractor). The ideal candidate for precertification is a would not consider a coverage request for neurosurgery from a service that is expensive (\$300 or more), not routinely chiropractor). The ideal candidate for precertification is a performed and for which data exists from national standards service that is expensive (\$300 or more), not routinely such as "Choosing Wisely" or other professional society performed and for which data exists from national standards recommendations that a denial rate of 15% or more would be such as "Choosing Wisely" or other professional society expected when the individual request is measured against recommendations that a denial rate of 15% or more would be Cigna's published criteria coverage (Cigna developed expected when the individual request is measured against Coverage Policy, MCG, or ASAM). Cigna's published criteria coverage (Cigna developed Coverage Policy, MCG, or ASAM). Treatment type subject to a higher potential for fraud, waste (v) and/or abuse: The evidentiary standard for when a treatment Treatment type subject to a higher potential for fraud, waste (v) and/or abuse: The evidentiary standard for when a treatment type subject to a higher potential for fraud, waste and/or abuse, as identified in publications by organizations that track trends type subject to a higher potential for fraud, waste and/or abuse, regarding fraud/waste/abuse in utilization of healthcare services as identified in publications by organizations that track trends regarding fraud/waste/abuse in utilization of healthcare services consistent with applicable law and regulation. Cigna specifically identifies fraud, waste and abuse as follows: consistent with applicable law and regulation. Cigna a. "Fraud" means knowingly and willfully executing, or specifically identifies fraud, waste and abuse as follows: attempting to execute, a scheme or artifice to defraud any a. "Fraud" means knowingly and willfully executing, or healthcare benefit program or to obtain (by means of false attempting to execute, a scheme or artifice to defraud any or fraudulent pretenses, representations or promises) any of healthcare benefit program or to obtain (by means of false the money or property owned by, or under the custody or or fraudulent pretenses, representations or promises) any of control of, any healthcare benefit plan/program. (18 U.S.C. the money or property owned by, or under the custody or § 1347)

- b. "Waste" means overutilization of services or other practices that, directly or indirectly, result in unnecessary costs to the healthcare system, including health benefit plans/programs. It is not generally considered to be caused by criminally negligent actions, but by the misuse of resources.
- c. "Abuse" means actions that may, directly or indirectly result in unnecessary costs such as payment for items or services when there is no legal entitlement to that payment and the individual or entity has not knowingly and/or intentionally misrepresented facts to obtain payment.

The evidentiary standard used for the ROI factor in the application of Prior Authorization of M/S services the Outpatient-All Other benefit classification is a ratio of 3.0. Codes not meeting the 3.0 ROI threshold assessed for potential removal from the prior are authorization/concurrent review program, with an emphasis placed on identifying ways to improve the cost-effectiveness of the reviews themselves by reducing administrative cost/expense (e.g., time to review). Cigna reviews the ROI of codes requiring precertification based on data contained in Cigna's Precertification Dashboard. Codes with ROI greater than 3 are considered as operationally effective and are not typically considered for removal, while codes with ROI less than 3 are considered for removal. Codes are removed with low ROI/savings and codes are included that have a higher ROI/savings based upon utilization review and cost trends.

The ROI ratio is calculated using the following formula:

- The actual or anticipated denial rate of the service multiplied by the average unit cost (or, as applicable, cumulative cost) of the service, with the resulting figure divided by the estimated cost to review the total number of services.
- For services for which Cigna maintains historic claims data, Cigna calculates the denial rate by reference to the actual denial rate as reflected in the historic book-of-business claims

control of, any healthcare benefit plan/program. (18 U.S.C. § 1347)

- b. "Waste" means overutilization of services or other practices that, directly or indirectly, result in unnecessary costs to the healthcare system, including health benefit plans/programs. It is not generally considered to be caused by criminally negligent actions, but by the misuse of resources.
- c. "Abuse" means actions that may, directly or indirectly result in unnecessary costs such as payment for items or services when there is no legal entitlement to that payment and the individual or entity has not knowingly and/or intentionally misrepresented facts to obtain payment.

The evidentiary standard used for the ROI factor in the application of Prior Authorization of MH/SUD services the Outpatient-All Other benefit classification is a ratio of 3.0. Codes not meeting the 3.0 ROI threshold are assessed for potential removal from the prior authorization/concurrent review program, with an emphasis placed on identifying ways to improve the cost-effectiveness of the reviews themselves by reducing administrative cost/expense (e.g., time to review). Cigna reviews the ROI of codes requiring precertification based on data contained in Cigna's Precertification Dashboard. Codes with ROI greater than 3 are considered as operationally effective and are not typically considered for removal, while codes with ROI less than 3 are considered for removal. Codes are removed with low ROI/savings and codes are included that have a higher ROI/savings based upon utilization review and cost trends.

The ROI ratio is calculated using the following formula:

- The actual or anticipated denial rate of the service multiplied by the average unit cost (or, as applicable, cumulative cost) of the service, with the resulting figure divided by the estimated cost to review the total number of services.
- For services for which Cigna maintains historic claims data,

<ul> <li>data it maintains. The average unit cost of the service is calculated based on Cigna's historical paid claims for the service across its commercial book of business. The estimated cost to perform a coverage review is \$40 per review, which is informed by costs/expenses such as personnel salaries and time.</li> <li>Cigna imposes step therapy and/or fail first requirements on certain M/S services including for example, MRI, gastric bypass, lumbar spine fusion where higher-cost therapies may be denied unless it can be shown that a lower-cost therapy is not effective (also known as "fail-first" policies or " step therapy" protocols).</li> </ul>	Cigna calculates the denial rate by reference to the actual denial rate as reflected in the historic book-of-business claims data it maintains. The average unit cost of the service is calculated based on Cigna's historical paid claims for the service across its commercial book of business. The estimated cost to perform a coverage review is \$100 per review, which is informed by costs/expenses such as personnel salaries and time. Cigna does not impose a Fail First/Step Therapy NQTL on MH/SUD services where higher-cost therapies may be denied unless it can be shown that a lower-cost therapy is not effective (also known as "fail- first" policies or " step therapy" protocols).

D. Identify the methods and analysis used in the development of the limitation(s); and

Mental Health/Substance Use Disorder Benefits (MH/SUD)
npatient, In-Network Services Requiring Prior Authorization
All non-emergent MH/SUD inpatient services are subject to pre-service nedical necessity review (i.e., prior authorization, precertification eview (PCR)) including Inpatient, In-Network and Inpatient, Out-of- Network benefits. Cigna has no additional Prior Authorization equirements applied to Out-of-Network MH/SUD benefits than it does to that applied to Inpatient, In-Network MH/SUD benefits.
Process
For a service subject to prior authorization, the enrollee's treating provider submits a request for benefit authorization of an inpatient level
f care electronically or by phone, fax or mail If the request cannot be
uthorized using an approved algorithm, t the case is referred to a nurse eviewer/care manager who collects and reviews the supporting clinical

information for medical necessity. If the nurse reviewer/care manager determines the enrollee meets criteria for the inpatient level of care requested, he/she authorizes the services at issue. If the nurse reviewer/care manager assesses the enrollee does not appear to meet medical necessity criteria for the inpatient level of care at issue, he/she refers the case to a peer reviewer (e.g. Medical Director) who reviews the clinical information and determines whether the enrollee meets medical necessity criteria for the inpatient level of care at issue (i.e., peer reviewer may authorize or deny benefit authorization depending upon the information provided by the treating provider). Cigna typically authorizes 1-4 M/S or MH/SUD inpatient days upon pre-service review. (See Peer to Peer Variation Analysis in Medical Necessity Section).	information for medical necessity. If the nurse reviewer/care manager determines the enrollee meets criteria for the inpatient level of care requested, he/she authorizes the services at issue. If the nurse reviewer/care manager assesses the enrollee does not appear to meet medical necessity criteria for the inpatient level of care at issue, he/she refers the case to a peer reviewer (e.g. Medical Director) who conducts a peer-to-peer review with the treating provider. The peer reviewer reviews the clinical information and determines whether the enrollee meets medical necessity criteria for the inpatient level of care at issue (i.e., peer reviewer may authorize or deny benefit authorization depending upon the information provided by the treating provider). Cigna typically authorizes 1-4 M/S or MH/SUD inpatient days upon pre-service review. (See Peer to Peer Variation Analysis in Medical Necessity Section).

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

#### Inpatient, In-Network Services Subject to Prior Authorization

Cigna has assessed several components of its utilization management program for NQTL compliance, including the methodology for determining which services will be subject to utilization management, the process for reviewing utilization management requests, and the process for applying coverage criteria.

A review of Cigna's written policies and processes reveals the comparable process by which MH/SUD and M/S services are selected for application of prior authorization within the applicable benefit classification the evidences comparability and equivalent stringency in-writing and in-operation.

First, a committee of Cigna-employed Medical Directors determines which M/S and MH/SUD services shall be subject to prior authorization or concurrent review. To the extent any MH/SUD services within the inpatient or outpatient classifications are considered for inclusion on the "precertification list" a Cigna-employed Medical Director with former practice experience as a psychiatrist and expertise in, and dedicated support for, behavioral health matters is consulted to ensure appropriate evaluation of MH/SUD services that may be considered for application of prior authorization and concurrent review.

Cigna's MTAC – which includes representation across a number of disciplines, including MH/SUD expertise – approves any implementation of, or changes to, coverage policies used to make medical necessity determinations to ensure the appropriateness of the same. The inclusion of appropriate representation of MH/SUD expertise in the coverage policy development process ensures that coverage policies for MH/SUD benefits

appropriately incorporate generally-accepted standards of practice, including consideration of type or duration of treatment or level of care for patients with specific MH/SUD conditions.

Comparable representation of expertise in MH/SUD services is therefore ensured to the extent any MH/SUD benefits may be considered for inclusion on the precertification list, thus ensuring comparable reviews of MH/SUD benefits. Moreover, the list of services subject to prior authorization and concurrent review is reviewed no less frequently than annually to determine if any services, whether MH/SUD or M/S, should be removed or added to the list, so the frequency of review of the continued appropriateness of application of prior authorization is comparable across MH/SUD and M/S benefits.

Cigna does not use different factors or evidentiary standards, or use the same factor and evidentiary standard differently, when reviewing MH/SUD and M/S benefits for continued inclusion on the prior authorization list. Because the benefit or value of conducting pre-service review of the treatment type outweighs the administrative costs associated with conducting the review, the treatment type is subject to pre-service medical necessity review (prior authorization).

An "in operation" review of Cigna's application of the Prior Authorization NQTL, specifically approvals and denial information, in the In-Patient, In-Network classification for a sampling of plans revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits for the Cigna book of business data. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

Cigna also reviewed the ROIs for both MH/SUD and M/S non-emergent inpatient admissions. For the purposes of the ROI calculation, the estimated costs to perform a coverage review, which is informed by costs/expenses for personnel salaries and time to review. Cigna reviewed the ROI for both M/S and MH/SUD non-emergent inpatient admissions. M/S services for non-emergent inpatient admissions calculated at 9:1 for 2019, 8:0 for 2020 and 10:1 for partial year 2021 and ROIs for MH/SUD services for non-emergent inpatient admissions calculated at 2.93:1 for 2019, 2.05:1 for 2020 and 2.03:1 for partial year 2021 respectively. These calculations are consistent with the factor/evidentiary standard outlined in Steps 2 and 3, namely that the application of prior authorization to inpatient M/S benefits produces a positive savings for both MH/SUD and M/S benefits, as measured in the aggregate across the Cigna-administered book-of-business. To be clear, if the number preceding the colon is greater than 1 (e.g., 2.93), then the application of prior authorization produces a positive ROI and thus meets the evidentiary standard for application of the same to MH/SUD or M/S inpatient benefits.

The process by which services are considered for application of Prior Authorization is comparable in writing and in operation across MH/SUD and M/S benefits, as evidenced by Cigna's assessment of several components of the prior authorization determination process in the overall context of its utilization management programs.

### **Outpatient Office Visits, In-Network Outpatient Office Visits**

Not Applicable

## All Other Outpatient, In-Network Services Subject to Prior Authorization

Cigna has assessed several components of its utilization management program for NQTL compliance, including the methodology for determining which services will be subject to utilization management, the process for reviewing utilization management requests, and the process for applying coverage criteria.

#### As Written

A review of Cigna's written policies and processes reveals the comparable process by which MH/SUD and M/S services are selected for application of prior authorization within the applicable benefit classification the evidences comparability and equivalent stringency in-writing and in-operation.

First, a committee of Cigna-employed Medical Directors determines which M/S and MH/SUD services shall be subject to prior authorization or concurrent review. To the extent any MH/SUD services within the inpatient or outpatient classifications are considered for inclusion on the "precertification list" a Cigna-employed Medical Director with former practice experience as a psychiatrist and expertise in, and dedicated support for, behavioral health matters is consulted to ensure appropriate evaluation of MH/SUD services that may be considered for application of prior authorization and concurrent review.

Cigna's MTAC – which includes representation across a number of disciplines, including MH/SUD expertise – approves any implementation of, or changes to, coverage policies used to make medical necessity determinations to ensure the appropriateness of the same. The inclusion of appropriate representation of MH/SUD expertise in the coverage policy development process ensures that coverage policies for MH/SUD benefits appropriately incorporate generally-accepted standards of practice, including consideration of type or duration of treatment or level of care for patients with specific MH/SUD conditions.

Comparable representation of expertise in MH/SUD services is therefore ensured to the extent any MH/SUD benefits may be considered for inclusion on the precertification list, thus ensuring comparable reviews of MH/SUD benefits. Moreover, the list of services subject to prior authorization and concurrent review is reviewed no less frequently than annually to determine if any services, whether MH/SUD or M/S, should be removed or added to the list, so the frequency of review of the continued appropriateness of application of prior authorization is comparable across MH/SUD and M/S benefits.

Cigna does not use different factors or evidentiary standards, or use the same factor and evidentiary standard differently, when reviewing MH/SUD and M/S benefits for continued inclusion on the prior authorization list. The factor and its accompanying evidentiary standard used to determine

whether prior authorization will apply to an outpatient service pursuant to the processes described herein, namely the ROI metric, is likewise uniform for MH/SUD and M/S benefits.

#### **In Operation**

An "in operation" review of Cigna's application of the Prior Authorization NQTL, specifically approvals and denial information, in the Outpatient All Other, In-Network and Out-of-Network classifications for a sampling of plans revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits.

Cigna reviewed the ROIs for both MH/SUD and M/S outpatient services subject to prior authorization/concurrent review and confirmed that the MH/SUD outpatient services subject to prior authorization/concurrent review revealed sufficiently positive ROIs to warrant continued application of prior authorization/concurrent review without further consideration.

Cigna regularly reviews utilization management data to evaluate and ensure operational compliance of the NQTL as referenced in the Medical Necessity Section of this document. Data is reviewed by benefit classification and sub-classification to calculate denial rates to ensure comparability. Cigna's application of the medical necessity NQTL, specifically approvals and denials rates for Concurrent Review across benefit classifications for a sampling of Cigna plans revealed no statistically significant discrepancies in medical necessity denial rates as-between MH/SUD and M/S benefits.

In the outpatient benefit classification, including the All Other sub-classification, denial rates for MH/SUD were on average lower than M/S services for the In Network Outpatient All Other sub-classification and had a less than 2 percentage point deviation in the Out-of-Network Outpatient All Other sub-classification for the Cigna book of business data.

any of the following:

- Inadequate volume of existing peer-reviewed, evidencebased, scientific literature to establish whether or not a technology, supplies, treatments, procedures, or devices is safe and effective for treating or diagnosing the condition or sickness for which its use is proposed;
- when subject to U.S. Food and Drug Administration (FDA) or other appropriate regulatory agency review, not approved to be lawfully marketed for the proposed use;
- the subject of review or approval by an Institutional Review Board for the proposed use except as provided in a clinical trial; or
- the subject of an ongoing phase I, II or III clinical trial, except for routine patient care costs related to qualified clinical trials.
- Whether the service is/may be excluded from coverage: Cigna assesses whether the plan/policy excludes from coverage a particular service, or for a particular use. Specifically, a service may be rendered for one or more uses covered by a benefit plan and one or more uses that are excluded by the benefit plan, or the intended use of the service cannot be identified based on the information provided in a submitted benefit claim. For example, benefit plan may exclude a service if it is rendered for cosmetic purposes, but the benefit plan may cover a service if it is rendered to treat a covered condition. The clinically appropriate uses for a service are determined through an assessment of available Clinical Evidence for the service.
- Whether the service presents a serious risk to enrollee safety: Whether a service presents a serious risk to enrollee safety is determined through an assessment of available Clinical Evidence for the service. Examples of safety issues considered to be potentially life-threatening include a service such as rapid detoxification under anesthesia, or the use of a service that is the subject of a serious warning or recall.

•

- Whether the service demonstrates significant variations from evidence-based care: A variation in evidence-based care must reflect a statistically significant standard deviation from the standard frequency or duration in treatment using the service, while accounting for operational and knowledge variations that may exist across providers and geographic areas. What is considered statistically-significant will vary by the type of service, as the frequency or duration in treatment standard may vary by service type.
- Whether there is a high incidence of fraud, waste, and/or abuse as identified in publications by organizations that track trends regarding fraud waste, and abuse in utilization of healthcare services.
- Whether the service is associated with a high average cost. Based on an assessment of Cigna's historical paid claims for the service across its commercial book of business, the average unit cost of the service must exceed five hundred dollars (\$500), unless either:
  - a. The service is an unlisted or non-specific code where the unit cost may vary from far less than \$500 to far more than \$500; or
  - b. The service is associated with serial use where the cumulative average use of the services may be represented by a single prior authorization and therefore exceed the dollar threshold.
- Performing coverage reviews for a service is projected to meet or exceed a certain return on investment ratio. The ROI ratio is calculated using the following formula:
  - a. The actual or anticipated denial rate of the service multiplied by the average unit cost (or, as applicable, cumulative cost) of the service, with the resulting figure divided by the estimated cost to review the total number of

- Whether the service demonstrates significant variations from evidence-based care: A variation in evidence-based care must reflect a statistically significant standard deviation from the standard frequency or duration in treatment using the service, while accounting for operational and knowledge variations that may exist across providers and geographic areas.   - a. The actual or anticipated denial rate of the service multiplied by the average unit cost (or, as applicable, cumulative cost) of the service, with the resulting figure divided by the estimated cost to review the total number

services.

b. For services for which Cigna maintains historic claims data, Cigna calculates the denial rate by reference to the actual denial rate as reflected in the historic book-of-business claims data it maintains. The average unit cost of the service is calculated based on Cigna's historical paid claims for the service across its commercial book of business. The estimated cost to perform a coverage review is \$100 per review, which is informed by costs/expenses such as personnel salaries and time.

"Clinical evidence" as referenced above includes publications from professional societies that include nationally recognized specialists in the appropriate field (e.g., American College of Obstetricians and Gynecologists); guidance published by appropriate Government Regulatory Agencies (e.g., CMS, FDA, NIH); and other original research studies, publish in the English language, peer reviewed, published, evidence-based scientific studies or literature.

Notably, the above-stated standards used to apply the factors as previously described may not in each case be associated with a specific quantitative threshold at which the NQTL is triggered, as not every factor lends itself to simply quantitative assessment. Rather, the quantitative factors mentioned above in each case requires subject matter experts like clinicians to qualitatively assess publications that do not define the factors relied on by Cigna to design its NQTLs in a numerical threshold or formula. By contrast, the quantitative factors that Cigna considers when deciding whether to apply prior authorization to MH/SUD and M/S benefits are defined by reference to specific thresholds at which the factor is met. of services.

b. For services for which Cigna maintains historic claims data, Cigna calculates the denial rate by reference to the actual denial rate as reflected in the historic book-of-business claims data it maintains. The average unit cost of the service is calculated based on Cigna's historical paid claims for the service across its commercial book of business. The estimated cost to perform a coverage review is \$100 per review, which is informed by costs/expenses such as personnel salaries and time.

Process	
Concurrent care reviews for M/S services are typically initiated by a provider telephonically a day or two before the last covered/authorized day.	<b>Process</b> Concurrent care reviews for MH/SUD services are typically initiated by a provider telephonically a day or two before the last covered/authorized day.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

### Inpatient, In-Network

Cigna applies the concurrent care review NQTL consistently to M/S benefits and MH/SUD benefits. In both M/S and MH/SUD services, concurrent care reviews are typically initiated by a nurse reviewer for M/S benefits or Care Manager (licensed behavioral health clinician) for MH/SUD benefits telephonically a day or two before the last covered/authorized day.

Cigna does not use different factors or evidentiary standards, or use the same factor and evidentiary standard differently, when reviewing MH/SUD and M/S benefits for Concurrent Review.

#### DRG Variation

Inpatient services reimbursed on the basis of a DRG/case rate and otherwise authorized pursuant to a prior authorization review are not subject to concurrent review because, for the duration of the period for which the DRG/case rate applies, the amount of benefits the plan is obligated to pay for a facility stay does not depend on the duration of time that the individual received care in the facility. DRG-based reimbursement creates incentives for hospitals to actively manage utilization but DRG-based fees do not exist for psychiatric hospitalizations. The lack of correlation

between the length of stay and the plan's obligation to pay benefits for the same means that assessing the ongoing medical necessity of a continued facility stay for coverage/benefit purposes is unnecessary for such period of time.

The case rate/DRG payment functions as payment in full for any and all services rendered to the individual for the pre-authorized course of treatment for the length of time covered by the case rate/DRG payment and over which the individual remains in the facility. The plan's liability for payment of benefits for services, and the individuals' cost-sharing obligation, does not increase or decrease depending on how long the individual remains in the facility receiving the pre-authorized treatment in question, unless the individual's stay extends beyond the time period that the DRG/case rate payment covers.

DRG-based reimbursement creates incentives for hospitals to actively manage utilization but DRG-based fees do not exist for psychiatric hospitalizations. Concurrent Review by Cigna is clinically appropriate and permissible for psychiatric hospitalizations as general medical hospitalizations that are not reimbursed based on DRGs are also subject to concurrent review. Differences in utilization management of inpatient behavioral health is not a more stringent application because DRG-based fees have not been established for psychiatric hospitalizations.

An "in operation" review of Cigna's application of the Concurrent Review NQTL, specifically approvals and denial information, in the "Inpatient, In-Network" classification revealed no statistically significant discrepancies in medical necessity denial rates as-between MH/SUD and M/S benefits. On average, denial rates for concurrent medical necessity review of In-Network Inpatient and Out-of-Network MH/SUD benefits were lower than M/S services.

A review of appeals data reveals comparable upheld and overturn rates and, on average, lower overturn rates for MH/SUD benefits in the out of-network outpatient and inpatient classifications for the Cigna book of business. Specifically, an analysis of the total out-of-network appeal overturn rate as-between inpatient MH/SUD and M/S services includes a 9 percent lower denial rate (about 30% to about 39%) for MH/SUD services concurrent review appeals for Out of Network, Out Patient, showed comparable appeal overturn rates (about 23% as-compared to about 27%) for MH/SUD and M/S services appeals to a concurrent review determination.

Cigna's methodology for determining which M/S services and which MH/SUD services within a classification of benefits are subject to concurrent care review as written and in operation, as well as its concurrent care medical necessity review processes applied to M/S services and for MH/SUD services as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/S services within the same classification of benefits.

#### **Outpatient Office Visits, In-Network**

Not Applicable

#### All Other Outpatient Services, In-Network

Cigna applies the Concurrent Review NQTL consistently to M/S benefits and MH/SUD benefits. In both M/S and MH/SUD services, concurrent care reviews are typically initiated by a nurse reviewer for M/S benefits or Care Manager (licensed behavioral health clinician) for MH/SUD benefits telephonically a day or two before the last covered/authorized day.

Coverage determinations of MS services and MH/SUD services are made in accordance with evidence-based treatment guidelines by physician peer reviewers licensed in the same or similar specialty area as the treating provider. Moreover, Cigna's methodology for determining which MH/SUD services within a classification of benefits are subject to concurrent care review is comparable to, and applied no more stringently than, its methodology for determining which M/S services within the same classification of benefits are subject to concurrent care review.

An "in operation" review of Cigna's application of the Concurrent Review NQTL, specifically approvals and denial information, in the "Outpatient, In-Network, Other Items and Services" classification revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits for the Cigna book of business.

While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

A review of concurrent review appeals data reveals comparable upheld and overturn rates and, on average, lower overturn rates for MH/SUD benefits in the out of-network outpatient and inpatient classifications for the Cigna book of business. Specifically, an analysis of the total out-of-network appeal overturn rate as-between inpatient MH/SUD and M/S services includes a 9 percent lower denial rate (about 30% to about 39%) for MH/SUD services concurrent review appeals for Out of Network, Out Patient, and nearly identical appeal overturn rates (about 23% as-compared to about 27%) for MH/SUD and M/S services appeals to a concurrent review determination.

Cigna's methodology for determining which M/S services and which MH/SUD services within a classification of benefits are subject to concurrent care review as written and in operation, as well as its concurrent care medical necessity review processes applied to M/S services and for MH/SUD services as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/S services within the same classification of benefits.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

As written: Cigna has assessed several components of its utilization management program for NQTL compliance, including the methodology for determining which services will be subject to utilization management, the process for reviewing utilization management requests, and the process for developing coverage criteria.

Cigna's methodology for determining which M/S services and which MH/SUD services within a classification of benefits are subject to retrospective review as written and in operation, as well as its retrospective medical necessity review processes applied to M/S services and for MH/SUD services as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/S services within the same classification of benefits.

**In operation:** Cigna has conducted a review of its application of the Retrospective Review NQTL, specifically approvals and denial information, which revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits for the Cigna book of business. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

The comparative analysis performed for application of Retrospective Review to inpatient and outpatient benefits evidences compliance with the MHPAEA NQTL requirement, in writing and in operation. Cigna's analysis of the process and policies governing the application of Retrospective Review across MH/SUD and M/S benefits, as well as the process by which MH/SUD and M/S services are selected for application of Retrospective Review, evidences comparability and equivalent stringency, in writing and in operation. The written process, the trigger for application of Retrospective Review, and the medical necessity standard used to review services subject to Retrospective Review, comparable across MH/SUD and M/S benefits, but the assessment of denial rates across a sample of Cigna-administered benefit plans do not reveal any potential "warning signs" warranting further assessment and/or changes to how the Retrospective Review NQTL is designed or applied to MH/SUD benefits.

The factor and its accompanying evidentiary standard used to determine whether Retrospective Review will apply to an inpatient or outpatient service pursuant to the above-described process, namely the ROI metric, is likewise uniform for MH/SUD and M/S benefits. Cigna does not use different factors or evidentiary standards, or use the same factor and evidentiary standard differently, when reviewing MH/SUD and M/S benefits for continued inclusion on the list of services subject to Retrospective Review.

Cigna's methodology for determining which M/S services and which MH/SUD services within a classification of benefits are subject Retrospective Review as written and in operation, as well as its medical necessity review processes, are no more stringent for MH/SUD services than for M/S services within the same classification of benefits.

## 5. <u>Emergency Services</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Not Applicable	Not Applicable

### B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Not Applicable.	Not Applicable.
Emergency M/S services are not subject to prior authorization or Concurrent Review.	Emergency MH/SUD services are not subject to prior authorization or Concurrent Review.

### C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Not Applicable.	Not Applicable.
Emergency M/S services are not subject to prior authorization or	Emergency MH/SUD services are not subject to prior authorization or
Concurrent Review.	Concurrent Review.

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Not Applicable.	Not Applicable.
Emergency M/S services are not subject to prior authorization or Concurrent Review.	Emergency MH/SUD services are not subject to prior authorization or Concurrent Review.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Not Applicable.

Cigna's integrated medical and behavioral health plans have only one, single benefit for emergency room and urgent care. Accordingly, there are no differences between how coverage for M/S and MH/SUD emergency room and urgent care services.

# 6. <u>Pharmacy Services</u>

# B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Some drugs are not covered on any formulary tier; these drugs may be referred to as "non-formulary" drugs. A drug may be designated as non- formulary or excluded for one of several possible reasons, whether it is an M/S or MH/SUD benefit. A drug may be designated as non- formulary because it is excluded from coverage by the benefit plan irrespective of medical necessity (e.g. the drug is not FDA-approved, or prescribed to treat a condition not covered by the benefit plan), or because the applicable formulary committee(s) determine after	Same as medical/surgical
consideration of several clinical and non-clinical factors that it doesn't warrant coverage on the formulary. If the P&T Committee identifies a drug as "Exclude" or "Optional," for example, then the Cigna VAC may designate the drug as non-formulary if it covers on the formulary a preferred covered alternative that is lower net cost option (inclusive of ingredient cost as sourced from claims/reimbursement information and	

Notably, Cigna does not apply prior authorization or step therapy requirements to any drugs used to treat an opioid use disorder or alcohol use disorder. Cigna does apply prior authorization or quantity limits to several MH/SUD drugs. Mental health drugs are generally considered to be controlled substances under federal law and, with the exception of drugs generally used to treat opioid use disorder and alcohol use disorder, Cigna applies prior authorization to controlled substances such as opioids used for pain management. This approach is consistent with Cigna's application of prior authorization to controlled substances on the basis of identified safety risks, and regardless of whether the controlled substance is used to treat an M/S condition, such as pain management, or an MH/SUD condition such as ADHD or bipolar disorder. Cigna applies prior authorization to M/S drugs for other reasons, such as specially drug/high cost status (i.e. specially drugs are subject to prior authorization), but these are rationales in addition to, and not exclusive of, the safety risk factor based on a drug's status as a controlled substance. Cigna applies step therapy to a number of brand drugs in certain MH/SUD and M/S therapeutic classes in order to incentivize the use of lower net cost (inclusive of ingredient cost and available manufacturer revenue) generic and/or preferred brand alternatives as identified through an analysis of claims/reimbursement	available rebate revenue) to Cigna as compared to therapeutic alternatives.	
	Notably, Cigna does not apply prior authorization or step therapy requirements to any drugs used to treat an opioid use disorder or alcohol use disorder. Cigna does apply prior authorization or quantity limits to several MH/SUD drugs. Mental health drugs are generally considered to be controlled substances under federal law and, with the exception of drugs generally used to treat opioid use disorder and alcohol use disorder, Cigna applies prior authorization to controlled substances such as opioids used for pain management. This approach is consistent with Cigna's application of prior authorization to controlled substances on the basis of identified safety risks, and regardless of whether the controlled substance is used to treat an M/S condition, such as pain management, or an MH/SUD condition such as ADHD or bipolar disorder. Cigna applies prior authorization to M/S drugs for other reasons, such as specialty drug/high cost status (i.e. specialty drugs are subject to prior authorization), but these are rationales in addition to, and not exclusive of, the safety risk factor based on a drug's status as a controlled substance. Cigna also applies step therapy to a number of brand drugs in certain MH/SUD and M/S therapeutic classes in order to incentivize the use of lower net cost (inclusive of ingredient cost and available manufacturer revenue) generic and/or preferred brand

( <b>M/S</b> )	(MH/SUD)
Some drugs are not covered on any formulary tier; these drugs may be	Same as medical/surgical
referred to as "non-formulary" drugs. A drug may be designated as non-	
formulary or excluded for one of several possible reasons, whether it is	

an M/S or MH/SUD benefit. A drug may be designated as nonformulary because it is excluded from coverage by the benefit plan irrespective of medical necessity (e.g. the drug is not FDA-approved, or prescribed to treat a condition not covered by the benefit plan), or because the applicable formulary committee(s) determine after consideration of several clinical and non-clinical factors that it doesn't warrant coverage on the formulary. If the P&T Committee identifies a drug as "Exclude" or "Optional," for example, then the Cigna VAC may designate the drug as non-formulary if it covers on the formulary a preferred covered alternative that is lower net cost option (inclusive of ingredient cost as sourced from claims/reimbursement information and available rebate revenue) to Cigna as compared to therapeutic alternatives.

Notably, Cigna does not apply prior authorization or step therapy requirements to any drugs used to treat an opioid use disorder or alcohol use disorder. Cigna does apply prior authorization or quantity limits to several MH/SUD drugs. Mental health drugs are generally considered to be controlled substances under federal law and, with the exception of drugs generally used to treat opioid use disorder and alcohol use disorder, Cigna applies prior authorization to controlled substances such as opioids used for pain management. This approach is consistent with Cigna's application of prior authorization to controlled substances on the basis of identified safety risks, and regardless of whether the controlled substance is used to treat an M/S condition, such as pain management, or an MH/SUD condition such as ADHD or bipolar disorder. Cigna applies prior authorization to M/S drugs for other reasons, such as specialty drug/high cost status (i.e. specialty drugs are subject to prior authorization), but these are rationales in addition to, and not exclusive of, the safety risk factor based on a drug's status as a controlled substance. Cigna also applies step therapy to a number of brand drugs in certain MH/SUD and M/S therapeutic classes in order to incentivize the use of lower net cost (inclusive of ingredient cost and available manufacturer revenue) generic and/or preferred brand

alternatives as identified through an analysis of claims/reimbursement	
information for the brand drugs.	

#### D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Cigna requires prior authorization, step therapy, or quantity limits for certain prescription drugs to ensure the prescribed drugs are medically necessary to treat the enrollee's condition. Cigna uses the same medical necessity standard when reviewing coverage for both M/S and MH/SUD drugs.	Same as medical/surgical
Cigna's prior authorization, step therapy, or quantity limit requirements were developed without regard to whether the prescription drugs are prescribed to treat a medical condition or a MH/SUD condition.	

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna has confirmed that its utilization management programs are applied comparably, and no more stringently, to MH/SUD drugs as compared to M/S drugs. Its written policies governing formulary placement and application of utilization management do not distinguish between the processes, factors or standards that inform design and application of the formulary placement and utilization management NQTLs. Indeed, Cigna uses one, combined policy to govern its formulary management and utilization management requirements across M/S and MH/SUD benefits, and, while uniformity in processes is not required by the NQTL requirements (only comparability), uniformity in processes for designing and applying an NQTL can evidence comparability in the NQTL as-written.

In terms of operational parity compliance, Cigna confirmed that all drugs, whether MH/SUD or M/S drugs, that the P&T Committee designates must be covered are, in fact, covered on the formulary, and all drugs' coverage conform to other P&T Committee clinical parameters dictating the circumstances under which a drug can be preferred over another drug through tier placement or subject to step therapy requirements mandating use of one drug over another for coverage purposes. Moreover, Cigna's coverage of MH/SUD and M/S drugs all conform to the

aforementioned standards established for Tier 1, Tier 2, Tier 3, and, as applicable for policyholders that elect to offer a specialty drug tier, Tier 4 placement status, and drugs subject to a utilization management requirement, including prior authorization, step therapy, and/or quantity limits, conform to the aforementioned standards established for inclusion in a utilization management program. That is, Cigna does not apply a utilization management requirement to an MH/SUD drug that does not exhibit the factors/standards described in the preceding columns that, as-written, justify application of a utilization management requirement to a drug, and in terms of stringency of application of the NQTL no M/S drugs are omitted from a utilization management requirement if they exhibit the same factors/standards.

While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTLs of formulary management and utilization management were applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

The application of the same NQTL standard across M/S and MH/SUD benefits demonstrates as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/S services within the prescription drug classification of benefits.

### 7. Prescription Drug Formulary Design

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)

# B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Factors	Same as Medical/Surgical
	Same as Medical/Surgical
In its decision criteria, the CHP VAC primarily considers the	
following factors:	
1. Pharmacy and Therapeutics ("P&T") Committee clinical	
safety and efficacy evaluation and designation.	
2. Economic implications to enrollees and plans.	
3. Status of drug as a generic, brand, or specialty drug	
4. Competitor/market practices	
5. Legal and regulatory requirements.	
When deciding whether to place a drug on a three-tiered formulary, and, if so, on which formulary tier, the formulary committee considers the following factors: the brand or generic status of a drug; whether, as applicable, a brand drug has available generic alternatives; whether the drug is the lowest net cost drug as compared to therapeutic alternatives; and whether a rebate arrangement exists for the drug to offset its cost.	
The source for the brand or generic status factor is a publication of drug indicators available from an external vendor (First DataBank). The sources for whether a drug has available generic alternatives are	
available drug indicators from First DataBank and other external	
information about other drugs available in the same therapeutic class.	
The sources for whether the drug is the lowest net cost drug as compared	
to therapeutic alternatives is internal drug claims utilization	

information. The source for whether a rebate arrangement exists for the	
drug to offset its cost is rebate contract or billing information.	

C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
<ul> <li>Evidentiary Standards In its decision criteria, the CHP VAC considers the following factors as defined by the noted evidentiary standards: </li> <li>Pharmacy and Therapeutics ("P&amp;T") Committee clinical evaluation and designation. The clinical P&amp;T Committee's designations are based on reviews of a drug's safety and efficacy and place in therapy, using available clinical evidence such as FDA label information and available clinical literature and guidelines (e.g. federal regulatory publications or professional society publications). The P&amp;T Committee assigns one of several clinical designations to a drug based on the drug's safety/efficacy and place in therapy: Access, Include, Optional, or Exclude. These designations dictate whether, from a clinical perspective a drug must be covered on the formulary, and whether a drug may be covered more favorably than therapeutically alternative drugs. A drug designated "Include" or "Access" must be covered to the extent medically necessary, and alternative drugs may not be preferred over it through application of tier placement or step therapy. A drug designated "Optional" may or may not be covered on the formulary, and may be subject to a step therapy protocol that requires the use of alternative drugs. </li> </ul>	Same as Medical/Surgical

exclusions of over-the-counter drugs or prescription drugs with overthe-counter alternatives:

**Include:** A drug may be given an include designation if it meets at least one of the clinical bases enumerated below and is anticipated, or validated via claims data, to treat relatively large patient population (i.e., greater than 1 in 50,000).

The clinical bases include:

- a. It has a unique indication for use addressing a clinically significant unmet treatment need;
- b. Its efficacy is superior to that of existing therapy alternatives;
- c. Its safety profile is superior to that of existing therapy alternatives, it has a unique place in therapy; and/or
- d. It treats medical condition(s) that necessitate individualized therapy and for which there are multiple treatment options. Include drugs must be placed on a tier of the applicable formulary by the Value Assessment Committee but may not be disadvantaged relative to other drugs in a drug grouping, as defined by the P&T Committee, with a less favorable clinical designation. A drug grouping is a list of drugs that generally possess the same mechanism of action and a similar place in therapy.

Access: A drug may be given an access designation if it meets at least one of the clinical bases enumerated below AND the drug is either anticipated, or validated via claims data at the time the P&T Committee renders a designation on the drug, to treat a relatively small subpopulation. The clinical bases include:

- a. It has a unique indication for use addressing a clinically significant unmet treatment need;
- b. Its efficacy is superior to that of existing therapy alternatives;
- c. Its safety profile is superior to that of existing therapy alternatives;
- d. It has a unique place in therapy; and/or

e. It treats medical condition(s) that necessitate individualized therapy and for which there are multiple treatment options.

Access drugs are forwarded to the Value Assessment Committee for further analysis of whether the drug should be covered on the applicable formulary and, if covered on the formulary, on which tier. The Value Assessment Committee may either place the drug on the applicable formulary or designate the drug as non-formulary. If the Value Assessment Committee does not place the drug on the formulary, the P&T Committee shall establish formulary exception clinical criteria.

**Optional:** A drug may be given an optional designation if a significant proportion of its use is similar in terms of safety and efficacy to other currently available drug alternatives. In certain instances, a drug designated as optional may have a unique use in a small subset of patients in relation to the overall use of the drug. The P&T Committee shall establish formulary exceptions to account for cases where the optional drug may have a unique use in a relatively small subset of patients. Optional drugs are forwarded to the Value Assessment Committee for further analysis of whether the drug should be covered on the applicable formulary and, if covered on the formulary, on which tier. The Value Assessment Committee may either place the drug on the formulary or designate the drug as non-formulary. If the drug is not placed on the formulary, the P&T Committee shall establish formulary exception clinical criteria.

**Exclude:** Drugs may be given an exclude designation for one or more of the following clinical reasons: efficacy inferior to that of existing therapy alternatives, a safety profile inferior to that of existing therapy alternatives, and/or insufficient data to evaluate the drug. Drugs recalled from the market for safety reasons are automatically designated as "Exclude" drugs, pending further P&T Committee review.

• Economic implications to enrollees and Cigna. When assessing potential formulary placement decisions, the CHP VAC reviews based on projected drug expenditure information

derived from available manufacturer revenue and claims costs whether a drug is a lower net cost option relative to any therapeutic alternatives.

- Status of drug as a generic, brand, or specialty drug. A drug is identified as generic or brand based on an algorithm that considers drug indicators made available by an external vendor called First DataBank. A drug is identified as a specialty drug based on the presence of one more of the following characteristics: the requirement for frequent dosing adjustments and intensive clinical monitoring to decrease the potential for drug toxicity and increase the probability for beneficial treatment outcomes; the need for intensive patient training and compliance assistance to facilitate therapeutic goals; limited or exclusive specialty pharmacy distribution (if a drug is only available through limited specialty pharmacy distribution it is considered specialty, even if it doesn't have other specialty drug characteristics); or specialized product handling and/or administration requirements.
- Competitor/market practices. This factor refers to an assessment of how competitors are covering drugs on their formularies based on publicly available information, which, while never determinative, may be considered when making certain formulary decisions.
- Legal and regulatory requirements. This factor refers to any legal or regulatory requirements that mandate certain drug coverage, such as tier placement requirements.

Cigna offers several formularies for its large group insured business. For most formularies, some drugs are not covered on any formulary tier; these drugs may be referred to as "non-formulary" drugs. A drug may be designated as non-formulary or excluded for one of several possible reasons, whether it is an M/S or MH/SUD benefit. A drug may be designated as non-formulary because it is excluded from coverage by the benefit plan irrespective of medical necessity (e.g. the drug is not

FDA-approved, or prescribed to treat a condition not covered by the benefit plan), or because the applicable formulary committee(s) determine after consideration of several clinical and non-clinical factors that it doesn't warrant coverage on the formulary. If the P&T Committee identifies a drug as "Exclude" or "Optional," for example, then the Cigna VAC may designate the drug as non-formulary if it covers on the formulary a preferred covered alternative that is lower net cost option (inclusive of ingredient cost as sourced from claims/reimbursement information and available rebate revenue) to Cigna as compared to therapeutic alternatives.

For large group insured plans, Tier 1 of the formulary includes covered generic drugs. Tier 2 of the formulary includes covered preferred brand drugs. Tier 3 of the formulary includes covered non-preferred brand drugs. The brand or generic status of a drug is determined by reference to an algorithm that analyzes available drug indicators, currently including First DataBank's drug indicator file, and not by reference to the drug's status as an M/S or MH/SUD benefit. Once brand drug status is determined by application of the algorithm, a covered brand drug is typically placed on Tier 2 for one of several reasons, including, for example, if the drug lacks available generic alternatives or if Cigna maintains a rebate arrangement for the brand drug, even if the brand drug has generic alternatives. Conversely, a covered brand drug is typically placed on Tier 3 if it either has available generic alternatives or Cigna lacks a rebate arrangement for the brand drug. Tier 4, if elected by the client plan sponsor, includes specialty drugs identified based on application of the above-stated definition.

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Cigna offers a multi-tiered formulary that includes covered MH/SUD and M/S drugs; a tiered formulary design is considered an NQTL and, as such, the methodology by which drugs are placed on specific formulary tiers is subject to the NQTL parity requirement.	Same as Medical/Surgical
Cigna offers a variety of prescription drug formularies comprised of generic, preferred and non-preferred brand name drugs, and specialty drugs. The coverage of drugs covered on Cigna's formularies are, subject to a client policyholder's election, determined by two internal/affiliated committees that perform different, but interrelated, functions: the Pharmacy & Therapeutics Committee ("P&T Committee"); and, the Cigna Value Assessment Committee (a/k/a Business Decision Team).	
The coverage of drugs covered on Cigna's formularies are, subject to a client policyholder's election, as applicable, determined by two internal/affiliated committees that perform different, but interrelated, functions: the Pharmacy & Therapeutics Committee ("P&T Committee"); and, the Cigna Health Plan Value Assessment Committee ("CHP VAC").	
The P&T Committee is composed of voting external clinicians across a number of specialties that perform, among other responsibilities, clinical reviews of drugs to determine whether a drug must be covered on the formulary as a clinical matter. In rendering clinical findings on drugs, the P&T Committee assesses the FDA labeling and, as appropriate and available, clinical practice standards/trends and documentation like clinical literature and guidelines.	
The CHP VAC is composed of representatives representing several functional areas of the combined company, including, for example, clinicians and representatives from our sales and economics areas, that	

D. Identify the methods and analysis used in the development of the limitation(s); and

have experience with formulary management or PBM/health plan
operations, and is responsible for deciding - within the clinical
parameters established by the P&T Committee - which drugs will be
covered on the formularies offered by Cigna. If the P&T Committee
finds that a drug must be covered on the formulary as a clinical matter,
then the Value Assessment Committee must place the drug on the
formulary. If the P&T Committee determines that a drug may or may
not be covered on the formulary as a clinical matter, then the CHP
VAC may consider other factors, including economic factors, when
deciding whether to place the drug on the formulary.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna does not distinguish, in writing or in operation, between M/S and MH/SUD benefits in its prescription drug formulary design for its Standard, Value, Advantage, Performance, and Legacy formularies. Formulary tiers are designed based on reasonable factors, consistent with the requirements of 45 CFR §146.136.

Cigna has confirmed that its formulary management and utilization management processes are applied comparably, and no more stringently, to MH/SUD drugs as compared to M/S drugs. Specifically, all drugs, whether MH/SUD or M/S drugs, that the P&T Committee designates must be covered are, in fact, covered on the formulary, and all drugs conform to other P&T Committee clinical parameters dictating the circumstances under which a drug can be preferred over another drug through tier placement or subject to step therapy requirements mandating use of one drug over another for coverage purposes.

Moreover, Cigna's coverage of MH/SUD and M/S drugs all conform to the aforementioned standards established for Tier 1, Tier 2, Tier 3, and, as applicable for policyholders that elect to offer a specialty drug tier, Tier 4 placement status, and

Cigna's review evidences that the processes and standards used to determine whether to subject a drug to utilization review is not only comparable, but identical, across M/S and MH/SUD drugs. The same P&T and CHP VAC committee structure reviews M/S and MH/SUD drugs for formulary placement and whether to subject a drug to a prior authorization requirement, and pursuant to common policies and procedures. The process for reviewing drugs for coverage does not differ by whether the drug is used to treat a M/S condition or a MH/SUD condition.

In terms of operational parity compliance, Cigna has also assessed as follows across its formularies: a comparable percentage of MH/SUD drugs are covered on v. off-formulary as compared to M/S drugs; a comparable, and in some cases lower, percentage of MH/SUD drugs are subject to prior authorization or step therapy requirements as compared to M/S drugs; and a comparable, and, in fact, lower, percentage of MH/SUD drugs are covered on the non-preferred brand tier (Tier 3) of the formularies offered by Cigna as compared to the MH/SUD drugs covered on Tiers 1 and 2. Cigna confirmed that all drugs, whether MH/SUD or M/S drugs, that the P&T Committee designates must be covered are, in fact, covered on the formulary, and all drugs' coverage conform to other P&T Committee clinical parameters dictating the circumstances under which a drug can be preferred over another drug through tier placement or subject to step therapy requirements mandating use of one drug over another for coverage purposes. Moreover, for its large group formularies Cigna's coverage of MH/SUD and M/S drugs all conform to the aforementioned standards established for Tier 1, Tier 2, Tier 3, and, as applicable for policyholders that elect to offer a specialty drug tier, Tier 4 placement status.

Cigna has also assessed as follows across its group formularies. First, a comparable percentage of MH/SUD drug NDCs are covered on v. offformulary as compared to M/S drug NDCs under such formularies (about 4% of MH/SUD and M/S drug NDCs each are covered off-formulary, with small variations to the tenths of a percent across the noted formularies). Second, a comparable, and, in fact, lower, percentage of MH/SUD drug NDCs are covered on the higher cost, non-preferred brand tier (Tier 3) of the group formularies offered by Cigna as compared to the MH/SUD drug NDCs covered on Tiers 1 and 2.

While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTLs of formulary management and utilization management were applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

Cigna employs measures to ensure comparability in both design and application of the multi-tiered formulary NQTL to MH/SUD and M/S prescription drug benefits. The written policies governing how MH/SUD or M/S drugs are placed on the formulary and tiered are uniform (i.e., on/off-formulary and tiering factors/standards) to ensure that the in-writing process and factors/standards relied on are comparable irrespective of the underlying use of the drug. Moreover, Cigna assesses outcomes data, including incidence rates for the application of utilization management NQTLs (i.e., the proportion of MH/SUD and M/S drugs that are subject to utilization management), to ensure that there are no significant discrepancies in the outcomes of the NQTLs' application across MH/SUD and M/S benefits that warrant further scrutiny of the formulary decision-making process. Finally, the P&T Committee annually reviews the formularies to ensure that the CHP VAC adheres to its clinical designations, irrespective of whether they are MH/SUD or M/S drugs, when making formulary placement/tiering decisions for Cigna's formularies.

Moreover, as further evidence of comparability and equivalent stringency in-operation, Cigna has also assessed as follows across its formularies: a comparable percentage of MH/SUD drugs are covered on v. off-formulary as compared to M/S drugs; a lower absolute number of MH/SUD drugs are covered off-formulary as compared to M/S drugs; a comparable, and indeed a lower, percentage of MH/SUD brand drugs

are covered on the non-preferred brand tier (Tier 3) relative to the total number of MH/SUD drugs covered on Tiers 1 and 2 of the formulary, as compared to the proportion of M/S drugs covered on Tier 3 relative to the total M/S drugs covered on Tiers 1 and 2 of the formulary. As all generic drugs covered on the formulary are placed on Tier 1 and no brand drugs are placed on Tier 1, whether MH/SUD or M/S benefits, the placement of drugs on Tier 1 of the formulary is deemed to meet the NQTL stringency and comparability requirements for formulary placement. Put differently, there are no differences in placement of covered generic drugs for MH/SUD or M/S drugs, as the evidentiary standard – which was consistently applied to the placement of MH/SUD and M/S drugs on the formulary – for Tier 1 placement is the generic status of a drug.

Additionally, by including a psychiatrist on the clinical P&T committee, Cigna ensures that comparable clinical expertise in treating MH/SUD conditions and M/S conditions is represented in the formulary decision-making process.

While physicians, regardless of specialty, are qualified under their scope of licensure to review the clinical safety/efficacy profile of an MH/SUD drug just as readily as M/S drugs used to treat conditions that the physician may not specialize in treating, Cigna acknowledges the benefits to its formulary management process of including MH/SUD expertise on the clinical P&T Committee. In the context of NQTL compliance, the inclusion of a physician with appropriate MH/SUD treatment expertise on the clinical P&T Committee that assigns clinical designations to M/S and MH/SUD drugs evidences the comparability of the process by which formulary management decisions are made, in writing and in operation, across M/S and MH/SUD prescription drug benefits.

Relatedly, it also helps to ensure for MH/SUD drugs the appropriate consideration of the factors and standards that inform Cigna's formulary management decisions. Moreover, Cigna does not distinguish, in writing, between M/S and MH/SUD benefits in its prescription drug formulary design for its large group plan formularies, and it takes steps to monitor the consistency of decision-making across MH/SUD and M/S drugs by performing policy reviews and assessing operational outcomes periodically. As described in detail under the narrative response to Steps 2 and 3, Cigna considers the same factors and accompanying evidentiary standards for MH/SUD and M/S drugs when designing its large group formularies pursuant to a uniform formulary decision-making process. The written process for reviewing drugs for coverage does not differ by whether the drug is used to treat an M/S condition or a MH/SUD condition, and in terms of the timing of decisions, the P&T Committee and Value Assessment Committee typically review all new-to-market drugs, whether MH/SUD or M/S drugs, within six months of market availability, and typically reviews potential opportunities to make formulary changes of any kind outside the context of new-to-market drug entries up to twice per year.

In summary, the comparative analyses documented here, which construe the application of the multi-tiered formulary design NQTL designed based on the factors articulated above, demonstrate the compliance in-writing and in-operation of the NQTL. While operational outcomes are not determinative of NQTL compliance, and a plan may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. In this case, there were comparable, and in some cases more advantageous, outcomes for the placement and tiering of MH/SUD drugs as compared to M/S drugs based on the absolute number of, and incidence of, non-formulary v. formulary and,

for on-formulary drugs, Tier 2 v. Tier 3 drugs under large group formularies. These comparable outcomes, along with the confirmation that the evidentiary standards and factors were actually applied consistently to MH/SUD drugs as compared to M/S drugs in terms of the adherence to P&T Committee clinical designations, evidence in-operation compliance in terms of comparability and equivalent stringency. Consequently, Cigna concludes that the NQTL of formulary management is applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

### **Case Management**

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

offered to eligible health plan enrollees with comple	x medical
conditions.	

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Participation in case management services is not required, and an enrollee's participation in case management services does not limit the scope or duration of benefits for either MH/SUD or M/S benefits. Consequently, case management does not function as an NQTL under the cited parity requirement. Notwithstanding the inapplicability of the NQTL requirement to Cigna's voluntary case management program, Cigna offers case management services to enrollees with either complex MH/SUD or M/S conditions.

### 8. Process for Assessment of New Technologies

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
No plan language	No plan language

#### B. Identify the factors used in the development of the limitation(s);

unproven.	unproven.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

The definition of experimental/investigational /unproven services is the same for MS and MH/SUD. A single review committee, Cigna's MTAC evaluates all new technologies for M/S and MH/SUD benefits. Cigna's methodology and processes for determining whether M/S interventions and MH/SUD interventions within a classification of benefits are experimental, investigational and/or unproven are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/s services within the same classification of benefits as written and in operation.

Cigna collects, tracks and trends relevant metrics on a semi-annual basis for services within each classification of M/S and MH/SUD benefits. Metrics may include initial EIU coverage denials, coverage denials upheld and overturned upon internal appeal and coverage denials upheld and overturned upon external appeal/review.

An "in operation" review of claims data from a sampling of Cigna-administered plans revealed no excessive denial rates for MH/SUD claims denied as experimental, investigational and unproven as compared to M/S claims denied as experimental, investigational and unproven. An "in operation" review of Cigna's application of the Experimental, Investigational, and Unproven NQTL, specifically approvals and denial information, in the "All Other Outpatient Services" classification revealed no statistically significant discrepancies in EIU denial rates as-between MH/SUD and M/S benefits.

While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

The application of the same NQTL standard across M/S and MH/SUD benefits demonstrates as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/S services within the same classification of benefits.

The use of MTAC for development of evidence based Coverage Policies for M/S and MH/SUD demonstrates as written and in operation reflect they are comparable and no more stringent for MH/SUD services.

#### 9. Standards for Provider Credentialing and Contracting

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
No plan language	No plan language

B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)

Network Admissions standards are designed and maintained by the Quality Programs & Accreditation ("QP&A") team, which serves as an Accreditation Center of Excellence working with independent agents, such as the National Committee for Quality Assurance ("NCQA"), Utilization Review Accreditation Commission ("URAC"), the Centers for Medicare and Medicaid Services ("CMS") and the National Alliance of HealthCare Purchaser Coalitions ("NAHPC"). Accreditation, certification and recognition by these organizations provides us with the external validation needed to show that we maintain high quality and meet nationally recognized industry standards. Cigna's mission is to improve the health, well-being and peace of mind of those we serve through an integrated approach to healthcare quality and affordability. Credentialing criteria for M/S Network Providers includes the	Network Admissions standards are designed and maintained by the Quality Programs & Accreditation ("QP&A") team, which serves as an Accreditation Center of Excellence working with independent agents, such as the National Committee for Quality Assurance ("NCQA"), Utilization Review Accreditation Commission ("URAC"), the Centers for Medicare and Medicaid Services ("CMS") and the National Alliance of HealthCare Purchaser Coalitions ("NAHPC"). cases (approximately 350 records).	

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna's methodology for credentialing for M/S providers and MH/SUD physician providers are the same.

Cigna maintains one credentialing committee for the review of providers entering the network. Cigna does not routinely track credentialing exceptions for either M/S or MH/SUD Network Providers. Network Providers are re-credentialed on a three-year cycle as required by NCQA.

NCQA Accreditation standards require that the organization maintain sufficient numbers and types of behavioral health, primary care and specialty care practitioners in its network. NCQA does not specifically dictate what the appropriate number/type should be. As a result, Cigna conducts review of its Network Adequacy standards at least annually to ensure requirements are sufficient for customer needs. Such analysis reviews external benchmarks (e.g., state laws or CMS requirements) as well as internal review of supply/demand and network adequacy enrollee complaints.

Cigna's methodology for credentialing for M/S and MH/SUD physician providers are the same. Cigna credentialing standards for licensed physicians follows NCQA, CMS, state and federal requirements and guidelines for each provider and/or specialty type. Cigna does not maintain separate standards for MH/SUD providers. Moreover, the standard credentialing process is used for both licensed physician providers and licensed non-physician providers, whether they are M/S or MH/SUD providers. Re-credentialing is required every three years for all providers, and except for work history and education and training verification, requires providers to meet the same criteria as the initial credentialing process, unless a new specialty is being requested.

The credentialing application process is consistent between physicians and facilities providing M/S and MH/SUD services and the required licensing, experience, CAQH application and verifications are indistinguishable. No additional Cigna-specific credentialing requirements are applied to either M/S or MH/SUD physician providers, and, as relevant for certain MH/SUD services or specialties, Cigna does not require that MH/SUD practitioners or facilities be licensed or accredited if such a license or accreditation would not be required by state law. Consistency in credentialing standards and process evidences compliance with the NQTL in-writing requirement.

An "in operation" review of Cigna's credentialing applications, approvals and denials of providers revealed no disparate outcomes in credentialing approvals or denials as between M/S and MH/SUD physician providers. The average time it took Cigna to review and approve a credentialing application for both M/S and MH/SUD providers was 15.5 days, an 18 day approval average for M/S providers and a shorter 13 day approval average for MH/SUD providers. The average time it took Cigna to review and deny a credentialing application for both M/S and MH/SUD providers are took Cigna to review and deny a credentialing application for both M/S and MH/SUD providers are took Cigna to review and deny a credentialing application for both M/S and MH/SUD providers are took Cigna to review and took average for MH/SUD providers. These credentialing process metrics indicate a comparable process in-operation based on the time to review, a significantly lower amount of denials of MH/SUD provider credentialing applications, and comparable incidences of denials of MH/SUD and M/S provider credentialing denial overturns on appeal. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

Consistent with the NQTL requirement for comparability/stringency, Cigna has confirmed that standards for provider admission into the MH/SUD provider network, including credentialing, for inpatient and outpatient services are comparable to, and applied no more stringently than, that of the M/S provider network as written and in operation. Put differently, Cigna's network has the ability to meet the MH/SUD services needs of our enrollees by providing reasonable access to a sufficient number of in-network providers for both inpatient and outpatient services.

Cigna's credentialing standards for licensed non-physician providers follows NCQA, CMS and state and federal requirements and guidelines for MS and MH/SUD providers. The credentialing application process is consistent between M/S and MH/SUD and such required licensing, experience, CAQH application and verifications are distinguishable only by differences in regulatory requirements. No additional Cignaspecific credentialing requirements are applied to either M/S or MH/SUD providers. Consistency in standards and process evidences compliance with the NQTL requirement.

Cigna does not distinguish between M/S and MH/SUD for purposes of credentialing unlicensed professionals and paraprofessionals. For M/S and MH/SUD, unlicensed providers may not be directly contracted or credentialed but may render services under a fully contracted and credentialed individual (supervising provider) or entity (clinic or facility)

Cigna's credentialing standards for unlicensed professionals and paraprofessionals follows applicable NCQA, CMS and state and federal requirements and guidelines for MS and MH/SUD providers. The credentialing application process is consistent between M/S and MH/SUD and such required licensing, experience, CAQH application and verifications are distinguishable only by differences in regulatory requirements. No additional Cigna-specific credentialing requirements are applied to either M/S or MH/SUD providers.

Consistency in standards and process evidences compliance with the NQTL requirement.

### 10. Exclusions for Failure to Complete a Course of Treatment

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

## B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Cigna has a National Network that includes providers within the United States. Cigna's policies do not cover anything other than urgent or emergent services if rendered outside of the United States.	Cigna has a National Network that includes providers within the United States. Cigna's policies do not cover anything other than urgent or emergent services if rendered outside of the United States.

#### C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Cigna has a National Network that includes providers within the United	Cigna has a National Network that includes providers within the United

States. Cigna's policies do not cover anything other than urgent or	States. Cigna's policies do not cover anything other than urgent or
emergent services if rendered outside of the United States.	emergent services if rendered outside of the United States.

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
Cigna has a National Network that includes providers within the United	Cigna has a National Network that includes providers within the United
States. Cigna's policies do not cover anything other than urgent or	States. Cigna's policies do not cover anything other than urgent or
emergent services if rendered outside of the United States.	emergent services if rendered outside of the United States.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna's geographic limitations on coverage for services apply uniformly across MH/SUD and M/S benefits.

Cigna standardly covers medically necessary services rendered by licensed and/or certified healthcare providers for the treatment of M/S conditions and MH/SUD conditions. Services determined by Cigna not to be medically necessary would excluded under the terms of the plan.

## 12. <u>Restrictions for Provider Specialty</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Not Applicable – The plan does not include restrictions for provider specialties.	Not Applicable – The plan does not include restrictions for provider specialties.

#### B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
Providers are required to work within the scope of their licenses. No	Providers are required to work within the scope of their licenses. No
additional restrictions apply.	additional restrictions apply.

#### D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
Providers are required to work within the scope of their licenses. No	Providers are required to work within the scope of their licenses. No
additional restrictions apply.	additional restrictions apply.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna requires providers to work within the scope of their licenses for both M/S and MH/SUD benefits. The process is consistent between M/S and MH/SUD benefits. Cigna does not, in writing or in operation, further restrict provision of MH/SUD benefits to certain types of specialties so long as the rendering provider is acting within the scope of the provider's license, and, in terms of stringency, Cigna confirms that it does not waive for any M/S providers the requirement that the M/S provider act within the scope of the provider's license in order for services to be covered.

#### 13. <u>Reimbursement for INN Providers, OON Providers, INN Facilities, OON Facilities (separately)</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

## B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
In-Network Provider Reimbursement	In-Network Provider Reimbursement
<ul> <li>Factors for reimbursement negotiation include:</li> <li>1. Geographic market, which may be adjusted based upon Medicare Geographical Practice Cost Index ("GPCI") Geographic Practice Cost Index (GPCI) reflects the relative cost of practicing in a locality against a national average. Each relative value is multiplied by the corresponding GPCI. The three component factors are then accumulated to arrive at an adjusted amount. This amount is then multiplied by the conversion factor to establish the Medicare full fee schedule amount in the Medicare Physician Fee Schedule Data</li> </ul>	Cigna's in-network provider reimbursement methodology, exclusive of DRG reimbursement is based upon factors including, but not limited to: geographic market (i.e. market rate and payment type for provider type and/or specialty); type of provider (i.e. hospital, clinic and practitioner) and/or specialty; supply of provider type and/or specialty; network adequacy and current Medicare reimbursement rates.

Base (MPFSDB). CMS performs calculations on the fee schedule, with the exception of carrier-priced procedure codes, and provides fee schedule calculations to the Medicare Administrative Contractors (MACs). Geographic Practice Cost Index is not weighted for purposes of per diem reimbursement;

- 2. Type of provider and/or specialty (e.g. physician practitioner v. non-physician practitioner v. facility); Provider types are dependent upon state licensing and credentialing requirements as outlined by the applicable state or NCQA. Cigna does not weight provider types or designate any additional provider and/or specialty designations (e.g. physician practitioner v. non-physician practitioner);
- 3. Supply of provider type and/or specialty. Provider specific fee schedules are used for multi-specialty specialty groups or unique specialty groups where reimbursement terms must be customized to meet the needs of that group or specialty. Provider specific or specialty fee schedules are used to retain providers if the providers are needed to meet network access requirements and/or increase membership. Supply of provider type and/or specialty are not weighted in relation to the other evidentiary standards for purposes of per diem reimbursement;
- 4. Network need and/or demand for provider type and/or specialty. Network need and/or demand for provider type or specialty is defined by state adequacy requirements. Cigna contracts with practitioners and providers across all networks and for all product lines to meet the availability and cultural needs and preferences of customers, establishes availability standards and assesses its networks against those standards articulated in Cigna's *Measuring Availability of Practitioners and Providers Policy*. Need and/or demand for provider type and/or specialty are not weighted in relation to the other evidentiary standards for purposes of per diem reimbursement;
- 5. Training, experience and licensure of providers billing for professional services under the facility agreement. Training, experience and licensure of providers billing for professional services under the facility agreement are not specifically weighted

|--|

C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
In-Network Provider Reimbursement	In-Network Provider Reimbursement
Medicare Baseline.Cigna utilizes the Medicare Pricing Tool to determine if the provider's (current) rates are above the defined Medicare Baselines. The minimum standards are designated as a percentage of Medicare reimbursement, according to licensure and Medicare locality. Cigna uses standard Medicare Resource Based Relative Value Scale ("RBRVS"), a CMS created reimbursement methodology to reimburse providers for members covered under the Medicare program and as a baseline for 	

RVUs are the basis of the RBRVS system. Unit values are assigned to each service (CPT code) by area of specialty and for some codes, different RVUs for site of service: facility and non-facility. Three components are used to make up a total RVU (1) Physician's work – This component accounts for the providers time, technical skill, mental effort, and physiological stress; (2) Practice expense – This component includes office rent, wages, supplies, equipment; (3) Malpractice Expense - This component includes professional liability insurance cost. To fill gaps for codes not covered by RBRVS methodology Cigna uses relative values assigned by Optum (Ingenix) for M/S services. Optum (Ingenix), is a third party health data company, that uses the same methodology originally used to develop the values for Medicare covered services. For those services that cannot be valued using a resource- based methodology, values have been developed using alternative methodologies proprietary to Optum (Ingenix). In an RBRVS calculation, each component of an RVU is multiplied by its GPCI then totaled and multiplied by the conversion factor to determine the fee or payment. Cigna uses the same GPCIs as Medicare. There are approximately 89 GPCIs. Cigna uses Optum (Ingenix) values to fill gaps for codes not covered by RBRVS methodology

Facility rate categories are industry standard with the market and economy dictating rates for both M/S and MH/SUD facilities. Cigna utilizes Medicare's resource-based relative value scale (RBRVS) calculation (OP- BH & Med). This calculation is premised on the principle that payments for services should vary with the resource cost for providing the services. In each instance, the fee schedule is separately reviewed and negotiated.

DRG reimbursement is based upon Medicare DRG calculations, which assign payment levels to each DRG based on the average cost of treatment. Case rates, also referred to as *flat rates*, describe a reimbursement structure in which providers receive a flat reimbursement rate for every patient visit, regardless of the service (most often utilized in urgent care). Cigna does not determine or mandate the reimbursement type; selection of reimbursement type is determined by the facility. Generally, M/S facility providers request DRG reimbursement, while MH/SUD facility providers request per diem reimbursement. More than 90% of MH/SUD Provider Network contracts reflect per diem reimbursement. The evidentiary factors taken into consideration in the negotiation of the per-diem rate are not weighted or prioritized one more than the other; however, additional consideration may be given to meet network adequacy standards.

For DRG reimbursement, weighting is not calculated within the contract or at the time of contract rate negotiation, but instead occurs at the time of payment as DRG reimbursement is dependent on a variety of variable factors such as patient age and diagnosis. When behavioral contracts at a per diem rate, the population and type of care are distinguished in the contract and rates are negotiated separately. Cigna utilizes CMS grouping software (Optum) that takes the information from the claim and "groups it" into the correct DRG. Then that DRG information is used to calculate the reimbursement, based on the factor in the contract; by way of example: DRG 203 has a factor 17; CMS DRG weight x contracted factor = reimbursement.

#### D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
In-Network Provider Reimbursement	In-Network Provider Reimbursement
Cigna's in-network provider reimbursement methodology, exclusive of	Cigna's in-network provider reimbursement methodology, exclusive of
DRG reimbursement is based upon factors including, but not limited	DRG reimbursement is based upon factors including, but not limited

network adequacy and current Medicare reimbursement rates.	network adequacy and current Medicare reimbursement rates.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

#### **In-Network Provider Reimbursement**

All staff participating in a contract negotiation for M/S and MH/SUD Network Providers and facilities are trained on internal Cigna policies and procedures, and have access to necessary tools to negotiate and develop appropriate reimbursement rates based on standard methodologies, provider specific reimbursement requests and escalate for justification and approval of any deviations.

#### As Written.

Whether for initial negotiation or renegotiation, Cigna's Network Provider reimbursement methodology for MH/SUD and M/S Network Providers are based upon the same array of factors. Re-negotiations of reimbursement rates are conducted according to the terms of the contract, or if not specified in the contract, they are conducted at the request of either party. The number of Network Providers (Individual, Group or Facility) joining or already part of the network does not factor into initial rate offerings. M/S and MH/SUD facilities may be reimbursed per diem, Diagnosis Related Group or case rate. Per diem reimbursement involves a flat dollar amount for each day as reimbursement for the service.

Cigna also follows a comparable process in determining payment rates for non-physician providers for both M/S and MH/SUD benefits. In this process, variables including market demand, provider specialty and availability and frequency of requests for provider fee increases may result in differentials in reimbursement rates across M/S and MH/SUD provider types.

#### **In Operation**

Whether for initial negotiation or renegotiation, Cigna uses its standard in-network provider reimbursement methodology for MH/SUD and M/S providers. Network adequacy deficiencies (Network Need) is always considered when negotiating reimbursement rates. Standard reimbursement rates for inpatient and outpatient services for both M/S and MH/SUD providers are set based upon standard fee schedules, which are developed for facilities, physicians and non-physicians by state or region and reflect geographic variations within that state or region.

Provider-specific fee schedules are developed based upon the professional or facility's negotiation request or business need, including the satisfaction of network adequacy requirements. Cigna's preferred standard is to reimburse the same rates across all plans/products. M/S contracts have the option to pay plans differently, while BH pays the same for all plans. This approach provides more favorable rates for MH/SUD providers. For example, BH pays the same rate for a Medicare provider as it does for a commercial provider. Rates may be negotiated differently depending upon plan if requested.

#### **Provider Reimbursement – Outpatient**

In terms of the process by which provider rates are negotiated, for both MH/SUD and M/S providers any revisions to the standard provider contract terms and reimbursement rates for both in network facility based services and in-network outpatient services are analyzed and negotiated by either a Recruiter or Contract Negotiator, with oversight from a Contracting Director. The same standard methodologies are used

for both M/S and MH/SUD rate negotiation and any substantial deviations from standard reimbursement rates must be justified and approved by more senior representatives in the respective contracting areas. All staff participating in contract negotiation are trained on internal Cigna policies and procedures, and have access to necessary tools to negotiate and develop appropriate reimbursement rates based on standard methodologies, provider-specific reimbursement requests and escalate for justification and approval any deviations. Factors assessed to determine whether to vary from the standard fee schedule are derived from, where available, Medicare rates including whether the provider experiences a high volume of utilization, the populations served, and the dynamics of the geographic market in which the provider is located (e.g. whether the provider is needed to fill or prevent an adequacy deficiency, and the competitiveness and acceptability of the requested rate). Indeed, the MH/SUD provider contracting process ensures by policy the consideration of such factors in connection with rate negotiations so as to avoid inappropriately discrepant negotiation outcomes and/or avoidable adequacy deficiencies.

#### Facility Reimbursement – Inpatient

In-network facility-based services which are not reimbursed on an assigned diagnosis-related group (DRG) or case rate basis may generally be reimbursed on a per diem or discount basis. Currently, M/S has many more DRG contracts while a small minority of MH/SUD contracts are paid as DRG or case rate. Specifically, M/S paid just under 60% of admissions last year under DRGs and 20% as per-diem, and 20% as a percent of charges. MH/SUD are essentially 100% per-diem, as MH/SUD contracts do not have any significant case rates or percent of charges contracts. DRG (i.e. case rate) reimbursement rates generally do not exist for MH/SUD in-network inpatient services because unlike certain routine medical inpatient procedures (i.e. vaginal deliveries; cesarean deliveries; appendectomies, etc.), MH/SUD inpatient stays vary depending upon the unique clinical needs, circumstances and complexities of the individual patient (i.e. patient's insight or lack of insight into their illness; patient motivation to receive treatment; comorbidity, etc.

Cigna's methodology and process for negotiating in-network provider reimbursements for M/S and MH/SUD services within a classification of benefits are comparable and no more stringent for MH/SUD services than for M/S services within the same classification of benefits as written. Cigna also follows a comparable process in determining payment rates for non-physician providers for both M/S and MH/SUD benefits. While there is variation in type of reimbursement methodology for facility reimbursement, Cigna's Network Providers choose which methodology (DRG, Per Diem or Case Rate) will apply and the processes, factors and evidentiary standards applicable to each methodology is applied to M/S and MH/SUD providers consistently. In this process, variables including market demand, provider specialty and availability and frequency of requests for provider fee increases may result in differentials in reimbursement rates across M/S and MH/SUD provider types.

An 'in operation" review of Cigna's M/S and MH/SUD reimbursement rates from a sampling of Cigna-administered plans revealed that M/S providers are reimbursed on average at a higher percentage of Medicare than MH/SUD providers. While there is a disparate outcome in the in-operational review of Cigna's M/S and MH/SUD reimbursement rates that results from differences in local market dynamics, such outcome does not mean the in-practice NQTL standards are non-comparable or being applied more stringently to MH/SUD benefits. Because in-network provider reimbursement is a factor relevant to NQTL compliance insofar as it impacts accessibility to in-network providers and Cigna's network admissions criteria, itself the relevant NQTL, Cigna emphasizes that the comparable out-of-network utilization over the recent measurement period across MH/SUD and M/S benefits and the achievement of applicable network adequacy requirements for MH/SUD and M/S providers,

respectively, evidences that any discrepancies in rates offered to MH/SUD providers is not affecting Cigna's ability to admit a sufficient number of providers.
